Data Quality Tip: June 2014

For Testing activities, the C&T Indicators Report can be used to compare the percent of newly identified confirmed positives (NICPs), previous confirmed positives, and preliminary positives referred to or offered: (1) HIV medical care, (2) prevention services, and (3) partner services.

Counseling Information Form (CIF) and Healthcare HIV Test Form (HTF)

PRELIMINARY & CONFIRMED POSITIVE REFERRALS

Referred to HIV medical care?
☐ (1) Yes → **If yes, did client attend first appointment?**
☐ (1) Yes → **Appointment date:** *(mm/dd/yyyy)*
☐ (0) No
☐ (8) Don't know
☐ (0) No → **If not referred to medical care, indicate why?**
☐ (1) Client already in HIV medical care
☐ (2) Client declined HIV medical care

Referred to HIV prevention services?
☐ (1) Yes → **If yes, did client receive HIV prevention services?**
☐ (0) No
☐ (1) Yes
☐ (0) No
☐ (8) Don't know

If female, is client pregnant?
☐ (1) Yes → **If yes, in prenatal care?**
☐ (0) No
☐ (8) Don't know
☐ (9) Declined
☐ (1) Yes
☐ (0) No
☐ (8) Don't know
☐ (9) Declined

PARTNER SERVICES

Were partner services discussed/offered this session? *(mark one ☒)*
☐ (1) Offered and accepted
☐ (2) Offered and refused
☐ (3) Not offered

Was skill building provided for self-notification?
☐ (1) Yes → **Number of partners to be self-notified:** *(0-999)*
☐ (0) No

Was client interviewed for partner elicitation at this agency? *(dual and 3rd party)*
☐ (1) Yes → **Interview date:** *(mm/dd/yyyy)* *(attach Partner Information Forms)* **Number of partners:** *(0-999) (dual & 3rd party)*
☐ (0) No

Was partner services referred out to another agency?
☐ (1) Yes → **Specify agency:** _____
☐ (0) No
Was client interviewed for partner elicitation?
☐ (1) Yes → **Interview date:** *(mm/dd/yyyy)* **Number of partners:** *(0-999) (dual & 3rd party)*
☐ (0) No
☐ (8) Don't know

Using the C&T Indicators Report to Compare Key Services Across Positive Type

For Testing activities, the positive services outlined in red above are system required when a client's HIV status is preliminary or confirmed HIV-positive.

You can use the C&T Indicators Report (indicators 4, 6, and 8) to compare the percent of NICPs, previous confirmed positives, and preliminary positives referred to or offered these key services. Make sure you select the three positive types above on the report parameters page; a separate Indicators report will be generated for each positive type.

	Total Tests				Newly-Identified Confirmed Positives																	
	Total Tests		Informed of Test Result		Indicator 1 Newly-Identified Confirmed Positive		Indicator 2 Informed of Confirmed Result		Indicator 3 Informed of Preliminary or Confirmed Result		Indicator 4 Referred to Care		Indicator 5 Referred to Care with Verified Medical Visit		Indicator 6 Offered Partner Services		Indicator 7 Accepted Partner Services		Indicator 8 Referred to Prevention Services		Indicator 9 Received Prevention Services	
	a		b	b/a	c	c/a	d	d/c	e	e/c	f	f/c	g	g/f	h	h/c	i	i/h	j	j/c	k	k/j
	#	%	#	%	#	%	#	%	#	%	#	%	#	%	#	%	#	%	#	%	#	%
TOTAL TESTED	0	0.0 %	0	0.0 %	0	0.00 %	0	0.0 %	0	0.0 %	0	0.0 %	0	0.0 %	0	0.0 %	0	0.0 %	0	0.0 %	0	0.0 %

CA Project Area Data

Within the CA Project Area (CPA), the percent of HIV-positive clients referred to HIV medical care, referred to HIV prevention services, and offered partner services was exceptionally lower for preliminary HIV-positive clients than it was for newly-identified and previously-identified confirmed HIV-positive clients in CY 2013 (see table below).

Key Activities by Positive Type: CY 2013 PS12-1201 CPA Targeted Testing Data

Indicator	Activity	Positive Type	Percent of HIV-Positive Clients Receiving Referral/Offer
4	Referred to HIV medical care	NICP	92.0%
		Previous CP	95.3%
		Preliminary Positive	61.3%
8	Referred to HIV prevention services	NICP	92.6%
		Previous CP	93.0%
		Preliminary Positive	55.9%
6	Offered partner services	NICP	93.1%
		Previous CP	93.0%
		Preliminary Positive	83.9%

* Data entered into LEO as of 4/28/14

Applying this DQ Tip in Your LHJ

Does your LHJ's data match the trend above? If so, consider the following:

1. Are positive services being offered and documented appropriately for preliminary positive clients?
2. Are there barriers to offering positive services to preliminary positive clients that can be addressed?
3. Are certain agencies or staff members having trouble offering or documenting these services? Note: The C&T Indicators Report can be used to replicate the table above at the agency-level; to do so, generate a C&T Indicators Report for each agency of interest.
