

Government Code

27491. It shall be the duty of the coroner to inquire into and determine the circumstances, manner, and cause of all violent, sudden, or unusual deaths; unattended deaths; deaths where the deceased has not been attended by either a physician or a registered nurse, who is a member of a hospice care interdisciplinary team, as defined by subdivision (e) of Section 1746 of the Health and Safety Code in the 20 days before death; deaths related to or following known or suspected self-induced or criminal abortion; known or suspected homicide, suicide, or accidental poisoning; deaths known or suspected as resulting in whole or in part from or related to accident or injury either old or recent; deaths due to drowning, fire, hanging, gunshot, stabbing, cutting, exposure, starvation, acute alcoholism, drug addiction, strangulation, aspiration, or where the suspected cause of death is sudden infant death syndrome; death in whole or in part occasioned by criminal means; deaths associated with a known or alleged rape or crime against nature; deaths in prison or while under sentence; deaths known or suspected as due to contagious disease and constituting a public hazard; deaths from occupational diseases or occupational hazards; deaths of patients in state mental hospitals serving the mentally disabled and operated by the State Department of Mental Health; deaths of patients in state hospitals serving the developmentally disabled and operated by the State Department of Developmental Services; deaths under such circumstances as to afford a reasonable ground to suspect that the death was caused by the criminal act of another; and any deaths reported by physicians or other persons having knowledge of death for inquiry by coroner. Inquiry pursuant to this section does not include those investigative functions usually performed by other law enforcement agencies. In any case in which the coroner conducts an inquiry pursuant to this section, the coroner or a deputy shall personally sign the certificate of death. If the death occurred in a state hospital, the coroner shall forward a copy of his or her report to the state agency responsible for the state hospital. The coroner shall have discretion to determine the extent of inquiry to be made into any death occurring under natural circumstances and falling within the provisions of this section, and if inquiry determines that the physician of record has sufficient knowledge to reasonably state the cause of a death occurring under natural circumstances, the coroner may authorize that physician to sign the certificate of death.

For the purpose of inquiry, the coroner shall have the right to exhume the body of a deceased person when necessary to discharge the responsibilities set forth in this section.

Any funeral director, physician, or other person who has charge of a deceased person's body, when death occurred as a result of any of the causes or circumstances described in this section, shall immediately notify the coroner. Any person who does not notify the coroner as required by this section is guilty of a misdemeanor.

27491.2. (a) The coroner or the coroner's appointed deputy, on being informed of a death and finding it to fall into the classification of deaths requiring his or her inquiry, may immediately proceed to where the body lies, examine the body, make identification, make inquiry into the circumstances, manner, and means of death, and, as circumstances warrant, either order its removal for further investigation or disposition or release the body to the next of kin.

(b) For purposes of inquiry, the body of one who is known to be dead from any of the causes or under any of the circumstances described in Section **27491** shall not be disturbed or moved from the position or place of death without permission of the coroner or the coroner's appointed deputy. Any violation of this subdivision is a misdemeanor.

27491.25. The coroner, or the coroner's appointed deputy, on being notified of a death occurring while the deceased was driving or riding in a motor vehicle, or as a result of the deceased being struck by a motor vehicle, shall take blood and urine samples from the body of the deceased before it has been prepared for burial and make appropriate related chemical tests to determine the alcoholic contents, if any, of the body. The coroner may perform other chemical tests including, but not limited to, barbituric acid and amphetamine derivative as deemed appropriate.

The detailed medical findings, resulting from those examinations that are conducted, shall either be reduced to writing or permanently preserved on recording discs or other similar recording media and shall include all positive and negative findings pertinent to the presence or absence of any alcoholic or other substance content.

This section shall not apply to the testing of deceased persons under the age of 15 years, unless the surrounding circumstances indicate the possibility of alcoholic, barbituric acid, and amphetamine derivative consumption, nor shall it apply when the death has occurred more than 24 hours after the accident.

27491.3. (a) In any death into which the coroner is to inquire, the coroner may take charge of any and all personal effects, valuables, and property of the deceased at the scene of death or related to the inquiry and hold or safeguard them until lawful disposition thereof can be made. The coroner may lock the premises and apply a seal to the door or doors prohibiting entrance to the premises, pending arrival of a legally authorized representative of the deceased. However, this shall not be done in such a manner as to interfere with the investigation being conducted by other law enforcement agencies. Any costs arising from the premises being locked or sealed while occupied by property of the deceased may be a proper and legal charge against the estate of the deceased. Unless expressly permitted by law, any person who enters any premises or tampers with or removes any lock or seal in violation of this section is guilty of a misdemeanor.

(b) Any property or evidence related to the investigation or prosecution of any known or suspected criminal death may, with knowledge of the coroner, be delivered to a law enforcement agency or district attorney, receipt for which shall be acknowledged.

(c) Except as otherwise provided in subdivision (d), any person who searches for or removes any papers, moneys, valuable property or weapons constituting the estate of the deceased from the person of the deceased or from the premises, prior to arrival of the coroner or without the permission of the coroner, is guilty of a misdemeanor. At the scene of any death, when it is immediately apparent or when it has not been previously recognized and the coroner's examination reveals that police investigation or criminal prosecution may ensue, the coroner shall not further disturb the body or any related evidence until the law enforcement agency has had reasonable opportunity to respond to the scene, if their purposes so require and they so request. Custody and control of the body shall remain with the coroner at all times. Reasonable time at the scene shall be allowed by the coroner for criminal investigation by other law enforcement agencies, with the time and location of removal of the remains to a convenient place to be determined at the discretion of the coroner.

(d) A peace officer may search the person or property on or about the person of the deceased, whose death is due to a traffic accident, for a driver's license or identification card to determine if an anatomical donor card is attached. If a peace officer locates such an anatomical donor card which indicates that the deceased is an anatomical donor, the peace officer shall immediately furnish such information to the coroner having jurisdiction.

"Peace officer," as used in this subdivision, means only that person designated in Sections 830.1 and 830.2 of the Penal Code.

27491.4. (a) For purposes of inquiry the coroner shall, within 24 hours or as soon as feasible thereafter, where the suspected cause of death is sudden infant death syndrome and, in all other cases, the coroner may, in his or her discretion, take possession of the body, which shall include the authority to exhume the body, order it removed to a convenient place, and make or cause to be made a postmortem examination or autopsy thereon, and make or cause to be made an analysis of the stomach, stomach contents, blood, organs, fluids, or tissues of the body. The detailed medical findings resulting from an inspection of the body or autopsy by an examining physician shall be either reduced to writing or permanently preserved on recording discs or other similar recording media, shall include all positive and negative findings pertinent to establishing the cause of death in accordance with medicolegal practice and this, along with the written opinions and conclusions of the examining physician, shall be included in the coroner's record of the death. The coroner shall have the right to retain only those tissues of the body removed at the time of the autopsy as may, in his or her opinion, be necessary or advisable to the inquiry into the case, or for the verification of his or her findings. No person may be present during the performance of a coroner's autopsy without the express consent of the coroner.

(b) In any case in which the coroner knows, or has reason to believe, that the deceased has made valid provision for the disposition of his or her body or a part or parts thereof for medical or scientific purposes in accordance with Chapter 3.5 (commencing with Section 7150) of Part 1 of Division 7 of the Health and Safety Code, the coroner shall neither perform nor authorize any other person to perform an autopsy on the body unless the coroner has contacted or attempted to contact the physician last in attendance to the deceased. If the physician cannot be contacted, the coroner shall then notify or attempt to notify one of the following of the need for an autopsy to determine the cause of death: (1) the surviving spouse; (2) a surviving child or parent; (3) a surviving brother or sister; (4) any other kin or person who has acquired the right to control the disposition of the remains. Following a period of 24 hours after attempting to contact the physician last in attendance and notifying or attempting to notify one of the responsible parties listed above, the coroner may perform or authorize the performance of an autopsy, as otherwise authorized or required by law.

(c) Nothing in this section shall be deemed to prohibit the discretion of the coroner to conduct autopsies upon any victim of sudden, unexpected, or unexplained death or any death known or suspected of resulting from an accident, suicide, or apparent criminal means, or other death, as described in Section 27491.

27491.41. (a) for purposes of this section, "sudden infant death syndrome" means the sudden death of any infant that is unexpected by the history of the infant and where a thorough postmortem examination fails to demonstrate an adequate cause of death.

(b) The Legislature finds and declares that sudden infant death syndrome (SIDS) is the leading cause of death for children under age one, striking one out of every 500 children. The Legislature finds and declares that sudden infant death syndrome is a serious problem within the State of California, and that public interest is served by research and study of sudden infant death syndrome, and its potential causes and indications.

(c) (1) to facilitate these purposes, the coroner shall, within 24 hours, or as soon thereafter as feasible, perform an autopsy in any case where an infant has died suddenly and unexpectedly.

(2) However, if the attending physician desires to certify that the cause of death is sudden infant death syndrome, an autopsy may be performed at the discretion of the coroner. If the coroner performs an autopsy pursuant to this section, he or she shall also certify the cause of death.

(d) The autopsy shall be conducted pursuant to a standardized protocol developed by the State Department of Health Services. The protocol is exempt from the procedural requirements pertaining to the adoption of administrative

rules and regulations pursuant to Article 5 (commencing with Section 11346) of Chapter 3.5 of Part 1 of Division 3 of Title 2 of the Government Code.

The protocol shall be developed and approved by July 1, 1990.

(e) The protocol shall be followed by all coroners throughout the state when conducting the autopsies required by this section. The coroner shall state on the certificate of death that sudden infant death syndrome was the cause of death when the coroner's findings are consistent with the definition of sudden infant death syndrome specified in the standardized autopsy protocol. The protocol may include requirements and standards for scene investigations, requirements for specific data, criteria for ascertaining cause of death based on the autopsy, and criteria for any specific tissue sampling, and any other requirements. The protocol may also require that specific tissue samples must be provided to a central tissue repository designated by the State Department of Health Services.

(f) The State Department of Health Services shall establish procedures and protocols for access by researchers to any tissues, or other materials or data authorized by this section. Research may be conducted by any individual with a valid scientific interest and prior approval from the State Committee for the Protection of Human Subjects. The tissue samples, the materials, and all data shall be subject to the confidentiality requirements of Section 103850 of the Health and Safety Code.

(g) The coroner may take tissue samples for research purposes from infants who have died suddenly and unexpectedly without consent of the responsible adult if the tissue removal is not likely to result in any visible disfigurement.

(h) A coroner shall not be liable for damages in a civil action for any act or omission done in compliance with this section.

(i) No consent of any person is required prior to undertaking the autopsy required by this section.

27491.44. Notwithstanding any other provision of law, the coroner is authorized to do all of the following:

(a) Assist the people of this state, as appropriate, in the implementation of the Uniform Anatomical Gift Act contained in Chapter 3.5 (commencing with Section 7150) of Part 1 of Division 7 of the Health and Safety Code, and in the otherwise lawful utilization of medically proven organ and tissue transplant procedures.

(b) Cooperate in the authorized removal and timely disposition of human organs and tissue from the bodies of deceased persons, including victims of homicide, in accordance with law and accepted medical practice.

(c) Assist medical and health service agencies in identifying donors of human organs and tissues, for purposes of providing life-enhancing benefits of transplant surgery to recipients under duly sanctioned medical conditions.

(d) Ask the deceased person's next of kin, at the time of notification of death, whether the deceased was a donor or if the family was a donor family. If not, the coroner is authorized to inform them of their option to donate viable organs and tissues.

(e) Enter into agreements with one or more procurement organizations to coordinate organ recovery procedures within that coroner's jurisdiction or in cooperation with other coroners throughout the state.

(f) Contract with or receive assistance of any kind from any public or private entity for the purpose of providing education and training to his or her personnel in pathology or any other area of the healing arts and sciences that will assist in timely determination of the causes of death.

27491.45. (a) (1) The coroner shall have the right to retain parts of the body, as defined in subdivision (g) of Section 7150.1 of the Health and Safety Code, removed at the time of autopsy or acquired during a coroner's investigation as may, in the opinion of the coroner, be necessary or advisable for scientific investigation and training. The coroner may employ or use outside laboratories, hospitals, or research institutions in the conduct of the coroner's scientific investigation or training.

(2) Parts of the body retained pursuant to paragraph (1) may be released by the coroner to hospitals, medical educational research institutions, and law enforcement agencies for noncoroner training, educational, and research purposes, either upon consent of the decedent or other person, as specified in Section 7151 of the Health and Safety Code, or after a reasonable effort has been made to locate and inform persons listed in subdivision (a) of Section 7151 of the Health and Safety Code of their option to consent or object to the release, and the appropriate person consents or that effort has been unsuccessful. A reasonable effort shall be deemed to have been made when a search for the persons has been underway for at least 12 hours. The search shall include a check of local police missing persons records, examination of personal effects, and the questioning of any persons visiting the decedent before his or her death or in the hospital, accompanying the decedent's body, or reporting the death, in order to obtain information that might lead to the location of any persons listed in subdivision (a) of Section 7151 of the Health and Safety Code.

(b) The coroner may, in his or her discretion, allow removal of parts of the body by a licensed physician and surgeon or trained transplant technician for transplant, or therapeutic, or scientific purposes pursuant to Chapter 3.5 (commencing with Section 7150) of Part 1 of Division 7 of the Health and Safety Code, only if the following conditions are met:

(1) The provision of the part will not unnecessarily mutilate the body or interfere with the autopsy.

(2) The decedent or other person, as specified in Section 7151 of the Health and Safety Code, has consented to the provision of the part, as prescribed by Section 7154 of the Health and Safety Code, or after a reasonable effort has been made to locate and inform persons listed in subdivision (a) of Section 7151 of the Health and Safety Code of their option to consent or object to the release, and the appropriate person consents, or that effort has been unsuccessful. A reasonable effort shall be deemed to have been made when a search for the persons has been underway for at least 12 hours. The search shall include a check of local police missing persons records, examination of personal effects, and the questioning of any persons visiting the decedent before his or her death or in the hospital, accompanying the decedent's body, or reporting the death, in order to obtain information that might lead to the location of any persons listed in subdivision (a) of Section 7151 of the Health and Safety Code. In obtaining this gift, the coroner shall notify the donor of the specific part or parts requested and shall obtain the donor's informed consent, as provided in Section 7150.5 or 7151 of the Health and Safety Code.

(c) Nothing in this section shall be construed as limiting any right provided for in Section 7152 of the Health and Safety Code.

(d) For purposes of this section, "trained transplant technician" means a person who has completed training in tissue removal for transplant or therapeutic or scientific purposes, which the coroner determines to be adequate for the purposes.

27491.5. The cause of death appearing on a certificate of death signed by the coroner shall be in conformity with facts ascertained from inquiry, autopsy and other scientific findings. In case of death without medical attendance and without violence, casualty, criminal or undue means, the coroner may, without holding an inquest or autopsy, make the certificate of death from statements of relatives, persons last in attendance, or persons present at the time of death, after due medical consultation and opinion has been given by one qualified and licensed to practice medicine and so recorded in the records of the death, providing such information affords clear grounds to establish the correct medical cause of death within accepted medical practice and within the requirements for accuracy prescribed by the Division of Vital Statistics of the State Department of Health Services. The coroner shall not finally exclude crime, suicide, or accident as a cause of death because of lack of evidence.

Health & Safety Code

102850. A physician and surgeon, physician assistant, funeral director, or other person shall immediately notify the coroner when he or she has knowledge of a death that occurred or has charge of a body in which death occurred under any of the following circumstances:

- (a) Without medical attendance.
- (b) During the continued absence of the attending physician and surgeon.
- (c) Where the attending physician and surgeon or the physician assistant is unable to state the cause of death.
- (d) Where suicide is suspected.
- (e) Following an injury or an accident.
- (f) Under circumstances as to afford a reasonable ground to suspect that the death was caused by the criminal act of another.

Any person who does not notify the coroner as required by this section is guilty of a misdemeanor.

102855. The coroner whose duty it is to investigate such deaths shall ascertain as many as possible of the facts required by this chapter.
